

# Brake and Accelerator Hand Control MERO 3

- Device Certified by TÜV. Suitable mainly for cars with automatic transmission.
- You can choose from several types of handles.
- **Two lever lengths**, 5 cm longer for SUVs or vans.
- Possibility to control the accelerator lever by **pulling or turning**.
- Thanks to its **compact dimensions** the system takes up very little space.
- All types of accelerator lever can be equipped with **electronic accelerator**. It results in gentle run with a small operating force.
- We supply the device with a **universal bracket for all cars**.
- We are able to adapt your specific requirements or the specifics of your market.

## Optional leather surface of lever cover and handle in various colours.
